Emoji hotkeys on WhatsApp web

Just stumbled over this post:

Been using the web version and loving it.. But i got to ask: are there any shortcuts for the emoticons? or at least an easier way to insert them? too lazy to take hand off keyboard → hold mouse → bunch of clicks → back too keyboard :P

[Source](#)

But there were no answers and I also can't find any information elsewhere.

I also noticed that the web client started to automatically convert your text smileys to emoticons, so far I know of :-) and :- *. Are there more?

```
function t() {
  var e = arguments.length <= 0 || void 0 === arguments[0] ? !1 : arguments[0];
  (0,
  l["default"])(this, t);
  var n = (0,
  h["default"])(this, (0,
  s["default"])(t).call(this));
  n.substitutions = {
    "(y)": " ",
    "(n)": " ",
    ":-)": " ",
    ":-(": " ",
    ":-p": " ",
    ":-|": " ",
    ":-\\": " ",
    ":-d": " ",
    ":-*": " ",
    "<3": "❤",
    "^_^": " ",
    ">_<": " ",
    ";-)": " "
  };
  var r = (0,
  o["default"])(n.substitutions).map(function(e) {
    return e.replace(/[\-\[\]\{\}\(\)\*\+\?\.\\\^\$\\]/g, "\\$&");
  });
  return n.regex = new RegExp("(" + r.join("|") + ")", "i"),
  n.skin = e,
  n
}
```

And for the non-mobile users without full emoji support: [before](#) and [after](#). I assume the last used skin color for the hand emojis is used, not sure what the e.replace() does but the result is used for the skin.
